Eligible Hospital and Critical Access Hospital Meaningful Use Core Measures

Measure 12 of 16

Date issued: November, 2012

Transition of Care

The movement of a patient from one setting of care (hospital, ambulatory primary care practice, ambulatory specialty care practice, long-term care, home health, rehabilitation facility) to another. At a minimum this includes all discharges from the inpatient department and after admissions to the emergency department when follow-up care is ordered by an authorized provider of the hospital

••

Summary of Care Record

A summary of care record must include the following elements:

Meaningful Use standard	ED transfer measures #
Patient name.	2
Referring or transitioning provider's name and office contact information (EP only).	1
Procedures.	7
Encounter diagnosis	5
Immunizations.	Not included
Laboratory test results.	7
Vital signs (height, weight, blood pressure, BMI).	3
Smoking status.	5, 6
Functional status, including activities of daily living, cognitive and disability status	3, 6
Demographic information (preferred language, sex, race, ethnicity, date of birth).	2
Care plan field, including goals and instructions.	5
Care team including the primary care provider of record and any additional known care team members beyond the referring or transitioning provider and the receiving provider.	1
Discharge instructions	5
Current problem list (Hospitals may also include historical problems at their discretion) At a minimum a list of current, active and historical diagnoses. We do not limit the eligible hospital to just including diagnoses on the problem list.	5
Current medication list, and	4
Current medication allergy list.	4
Current allergy list: An exaggerated immune response or reaction to substances that are generally not harmful.	4,5,6,
Care Plan: The structure used to define the management actions for the various conditions, problems, or issues. A care plan must include at a minimum the following components: problem (the focus of the care plan), goal (the target outcome) and any instructions that the provider has given to the patient. A goal is a defined target or measure to be achieved in the process of patient care (an expected outcome).	5
